

# Mojo

## Revolutionising property management, one process at a time

Mojo is an eco-system of web-based apps, perfectly integrated with all Trace's enterprise-level property systems. Each app takes an individual property management process and makes it faster, simpler, better.

---

### Benefits

- Accurate, approved data
- The confidence to automate
- Interactive real time reports & enquiries
- Simplified forms, with unnecessary fields removed
- Comprehensive audit trails, with notes & supporting evidence
- Puts the right app in front of the right person at the right time
- The person closest to the data actually enters the data
- Allows suppliers, tenants, clients & investors to self serve

### Description

Mojo apps range from lease input forms (with up to five levels of approval), to sophisticated dashboards that display personalised portfolio information in real time.

Mojo engages all your staff, automatically putting the right app in front of the right person at the right time. It ensures that all the data stored in your system is accurate and fully approved, to give you the confidence to automate. And it permits real time reporting and enquiries.

Outside your organisation, it allows suppliers, tenants, clients and investors to self serve.

Mojo is revolutionising property management, one process at a time.

## How Mojo works

Mojo adds a light, intuitive cloud layer to Trace's famously rock solid enterprise software. Crucially, it opens up that software to the non-expert: Mojo apps can be used by staff across your organisation without training.

As one example, a Mojo app for data entry will contain only the fields that the individual user is able to complete. The form then passes to others for further enrichment or approval, and its contents are stored as draft until the point it is allowed to update the live database.

Other Mojo apps provide reports and information in real time, via personalised online dashboards. Still more allow suppliers, tenants and investors to self serve. But each (and we are developing new ones all the time) has been designed iteratively to optimise for business

function and more especially for user experience.

People prefer to use Mojo apps rather than traditional systems. That's the genius of the Mojo system.

## Mojo apps currently available

- Mojo Smart Forms
- Mojo Approvals
- Mojo Enquiries & dashboards
- Mojo for Suppliers
- Mojo for Tenants
- Mojo for Clients & Investors
- Mojo Smart Invoice Approval
- Mojo Task Management
- Mojo Activity List

*"I was so excited when I first saw Mojo - I had to have it!. It's so simple. I love it. It takes me moments to do something that used to take me half a day. I just feel so much more productive. I'm churning out so much more work, it's incredible!"*
